GERMAN DELEGATION

COCOM DOCUMENT 4180
Paris, October 3, 1960MEMORANDUMBY THE GERMAN DELEGATION ON THE
EXPORT TO POLAND OF 1 HEATEXCHANGER

The German authorities refer to their memorandum COCOM DOC 3439 (see also DOC 2887) and have the honour to submit to the Committee another application to licence the export to Poland of

1 heat-exchanger,
consisting of nickel-plated tubes
for 300 atü
valued at \$ 20.262,--.

This heat-exchanger will be used as replacement part in an installation for the production of carbolic acid which was delivered to Poland by Krebs & Co., Paris and Berlin, in 1953 and mounted in the factory Zakłady Chemiczne Oswiecim, at Oswiecim-Dwory. The nickel-plating of the 4 heat-exchangers contained in this installation possess only a limited operational life. They must, therefore, be replaced from time to time.

In view of the civilian end-use the German authorities wish to grant the licence and trust that no objections will be raised against this export. Assurances against reexport or diversion have been obtained from the Polish authorities. The German Delegation would appreciate to have the views of governments at an early opportunity.
